VEPARI AI

Financial Intelligence & Profit Guardian

Package 2 • 50 features • 10 shared core problems • Know the money.

Clean structured deep-dive document for startup / hackathon use

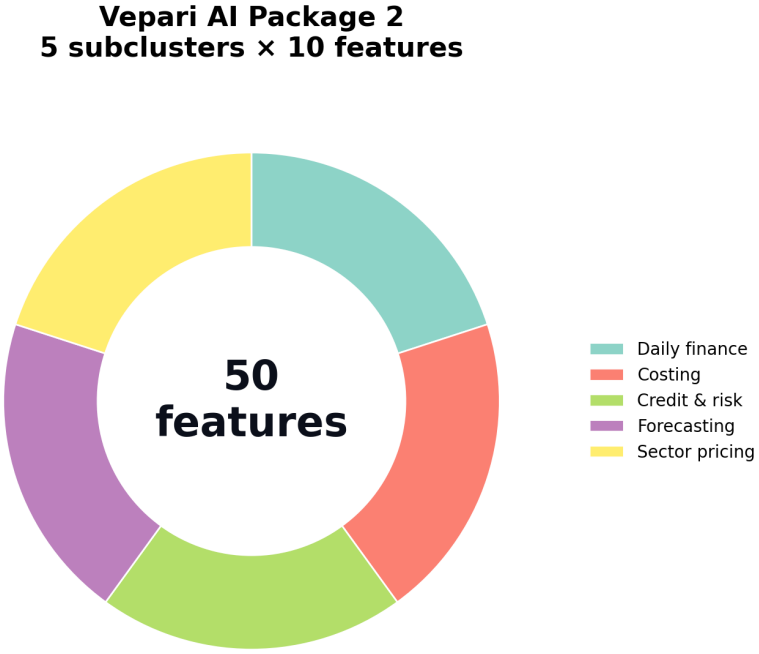

Goal: turn 220 micro-enterprise problems into 4 clean docs, each with 50 features, charts, diagrams, and AI solutions.

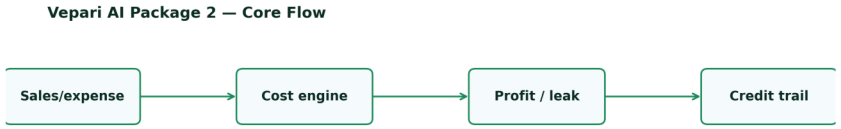

10 Core Problems (Shared Across All 4 Documents)

Core Problem	Why it is a problem	Measure	AI response
Operational Blindness & Business Amnesia	Business memory stays in one owner's head; no records, no SOPs, no continuity.	Tasks logged, customer/supplier history stored, decision recall time.	Voice-first memory engine, auto-SOPs, searchable business archive.
Financial Invisibility & Cash Flow Blindness	Revenue is mistaken for profit; costs, labour, GST and overhead are missed.	Daily profit visibility, cash gap alerts, monthly P&L produced.	AI profit engine, cash forecast, unit-cost calculator.
Hidden Profit Leakages	Small losses from discounts, wastage, theft, bad debt and wrong change compound daily.	Leakage % by category, shrinkage rate, recovery rate.	Anomaly detection, credit reminders, waste and fraud alerts.
Credit Exclusion & Formal Finance Gap	No records means no loan history; micro businesses get stuck with costly informal credit.	Credit trail built, lender-ready statement generated, approval readiness score.	Alternative credit score, bank-ready financial profile.
Government Scheme Blindness	Eligible owners do not know schemes, documents or application steps.	Scheme matches found, forms completed, deadlines tracked.	AI scheme navigator with guided applications in Tamil.
Market Intelligence Void & Information Asymmetry	Owners buy and sell without price trends, demand shifts or competitor visibility.	Trend alerts, competitor comparison, seasonal demand forecast.	Market radar, commodity alerting, opportunity detection.
Decision Fatigue & Cognitive Overload	One person handles all roles; fatigue leads to slow, low-quality decisions.	Task overload, decision delays, burnout risk.	AI priority planner, nudges, automated routine decisions.
Knowledge Death / Craft Mortality	Skills, recipes, and supplier know-how disappear when the owner leaves.	Knowledge captured, handover readiness, documentation coverage.	AI knowledge capture, craft digitisation, succession planner.
Customer Retention Invisibility	No CRM means repeat customers, churn and loyalty are invisible.	Repeat rate, churn rate, reactivation rate, offer conversion.	Voice CRM, reactivation engine, personalised offers.
Digital Market Access Exclusion	Businesses stay local because they lack listings, digital presence and onboarding help.	Profiles created, catalogue live, orders from outside local area.	ONDC, WhatsApp catalogue, Google profile, listing generator.

Package 2 Overview

- Purpose: Know the money.
- Core focus: Daily finance, Costing, Credit & risk, Forecasting, Sector pricing
- Built for voice-first, Tamil-first adoption.
- Turns the 10 shared problems into one package-level system.

Package Map

Layer	Solves	Output
Problem coverage	Operational memory, continuity, learning	Business stays documented
User value	Voice-first, low friction, Tamil support	Easy daily adoption
Business value	Faster decisions, less waste, more growth	Practical ROI

Feature Cluster 1 — Daily finance

- Focus: Feature Cluster 1 — Daily finance

#	Feature	Solves	Input	AI output / impact
1	Daily Revenue & Expense Logger	P23, P25	Sales + expense voice note	Daily financial entry | Builds financial truth
2	Personal / Business Expense Splitter	P24	Mixed purchase note	Tagged expense split | Separates household from business
3	AI Profit Calculator	P23, P31	Revenue + expense log	Real profit | Sees actual profit
4	Cost-Per-Unit Builder	P4, P27, P28	Ingredient / labour / overhead data	Full unit cost | Prevents wrong pricing
5	Own Labour Time Cost Engine	P27, P216	Hours worked	Labour cost value | Stops free-labour pricing
6	Electricity Cost Allocator	P26, P58	Bill + business usage	Per-unit electricity cost | Hidden overhead visible
7	Equipment Depreciation Tool	P28	Machine cost + life	Monthly depreciation | True cost of production
8	Packaging Cost Engine	P30	Pack count + cost	Cost per item | Better margin math
9	Transport Cost Recovery	P29, P61	Delivery trips + distance	Per-order transport cost | Stops absorbed delivery loss
10	Waste-Adjusted Profit Calculator	P31, P52, P177	Wastage %	True profit after waste | Finds silent losses

Feature Cluster 2 — Costing

- Focus: Feature Cluster 2 — Costing

#	Feature	Solves	Input	AI output / impact
1	GST-Adjusted Margin Calculator	P32, P61	GST rate + sale price	Net margin after GST | Stops GST surprise
2	Monthly P&L Generator	P33, P34	Month logs	Tamil P&L summary | First clear statement
3	Gross Margin Dashboard	P34	Product sales + costs	Margin ranking | Find best sellers
4	Cash Flow Forecast Engine	P35, P36	Expense calendar + sales trend	30-day cash forecast | Prevents cash crisis
5	Seasonal Budget Planner	P36, P109	Festival dates + expenses	Advance savings plan | Prepares early
6	Expense Alert Calendar	P37	Recurring bills	Expense reminders | No surprise outflows
7	Multi-Channel Revenue Aggregator	P38	Cash + UPI + WhatsApp sales	One revenue total | Full money picture
8	Working Capital Explainer	P41	Business cycle data	Simple cash cycle view | Teaches money flow
9	Break-Even Calculator	P44, P127	Fixed + variable costs	Break-even units | Knows survival point
10	Business Health Score	P45	All financial inputs	0–100 health score | Quick business pulse

Feature Cluster 3 — Credit & risk

- Focus: Feature Cluster 3 — Credit & risk

#	Feature	Solves	Input	AI output / impact
1	Advance Tax Estimator	P42	Annual sales estimate	Advance tax amount | No year-end shock
2	Barter Recorder	P39	Exchange deal	₹ equivalent entry | Records informal trade
3	Buyer Credit Terms Tracker	P40, P76	Wholesale credit note	Due-date tracker | Stops overdue dues
4	Discount Impact Analyser	P46, P56	Discount decision	Profit loss from discount | Makes discount strategic
5	Portion Standard Enforcer	P47	Standard recipe size	Portion deviation alert | Cuts food waste
6	Supplier Short-Weight Fraud Detector	P48, P126	Delivered weight	Fraud risk flag | Stops supplier cheating
7	Transaction Anomaly Detector	P49, P54	Sales vs cash	Mismatch alert | Detects theft patterns
8	Inventory Shrinkage Tracker	P50, P180	Opening / closing stock	Shrinkage % | Tracks disappearing stock
9	Bad Debt Recovery System	P51, P6	Credit list	Recovery reminders | Improves collections
10	Perishable Purchase Planner	P52, P57	Daily demand	Recommended purchase qty | Less spoilage

Feature Cluster 4 — Forecasting

- Focus: Feature Cluster 4 — Forecasting

#	Feature	Solves	Input	AI output / impact
1	Billable Hours Tracker	P53	Free work hours	Unpaid work value | Stops free consulting
2	Seasonal Overstock Liquidator	P63	Dead stock list	Clearance strategy | Recovers capital
3	Preventive Maintenance Scheduler	P64, P17	Service dates	Service alerts | Prevents breakdowns
4	Cash Separation Advisor	P65	Home cash usage	Business cash plan | Stops household leakage
5	Rental Market Benchmark	P66	Business location	Fair rent compare | Saves monthly cost
6	Labour Productivity Tracker	P67	Worker output	Productivity metric | Improves labour value
7	Credit Trail Builder	P68, P69, P83	Logged financial history	Lender-ready trail | Builds loan credibility
8	Alternative Credit Score Engine	P69, P77	Transactions + repayments	AI credit score | Access without bank history
9	Lender-Ready Financial Statement	P68, P75	3–6 months logs	Bank-format statement | Loan application ready
10	UPI-to-Credit-Score Converter	P77	UPI history	Credit contribution score | Every payment builds credit

Feature Cluster 5 — Sector pricing

- Focus: Feature Cluster 5 — Sector pricing

#	Feature	Solves	Input	AI output / impact
1	Formal vs Informal Loan Comparator	P74	Loan amount + rate	True loan cost view | Shows moneylender pain
2	GST Refund Status Tracker	P84, P88	GST filing status	Refund tracking alert | Faster working capital
3	Delayed Payment Recovery Guide	P76	Buyer overdue details	MSMED guidance | Recover paid-on-time rights
4	Women Entrepreneur Credit Navigator	P82	Owner + business info	Women-focused credit options | Fairer access to loans
5	Per-Dish Cost & Margin Calculator	P174, P175	Recipe quantity + costs	Dish cost and price | Food pricing accuracy
6	Delivery Margin Calculator	P179	Platform fee + sale price	Net margin after commission | Know if delivery makes sense
7	Bulk Deal Margin Calculator	P56	Bulk order + discount	Margin impact | Smarter wholesale deals
8	Project Bid Calculator	P200	Materials + labour + days	Bid price with margin | Profitable contract bids
9	Fare Viability Calculator	P199	Fuel + distance + time	Minimum viable fare | Stops loss-making trips
10	True-Cost Hobby-to-Business Converter	P216, P27	Ingredients + hours	True cost + price | Makes hobby viable

How this package works in the real world

- Know the money. through simple voice or WhatsApp input.
- Every feature is mapped to one or more of the 10 shared core problems.
- The output is minimal, actionable, and designed for low-literacy users.
- The package can be used as MVP, then expanded into a full AI OS.

Impact if this package works

Visible effect	Invisible effect	Business result
Less manual work	Business memory no longer depends only on the owner	Faster daily decisions
Better visibility	Hidden losses become measurable	Higher profits
Cleaner records	Customer / supplier / finance history preserved	Easier growth and handover
