VEPARI AI

Market Intelligence & Customer Growth Engine

Package 3 • 50 features • 10 shared core problems • Understand the market.

Clean structured deep-dive document for startup / hackathon use

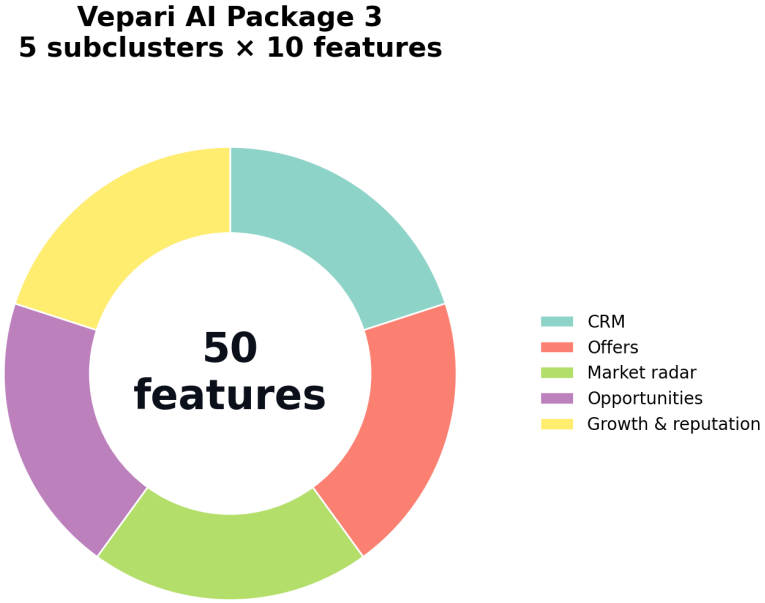

Goal: turn 220 micro-enterprise problems into 4 clean docs, each with 50 features, charts, diagrams, and AI solutions.

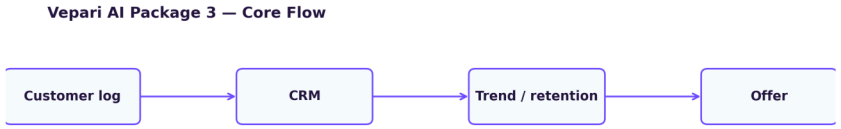

10 Core Problems (Shared Across All 4 Documents)

Core Problem	Why it is a problem	Measure	AI response
Operational Blindness & Business Amnesia	Business memory stays in one owner's head; no records, no SOPs, no continuity.	Tasks logged, customer/supplier history stored, decision recall time.	Voice-first memory engine, auto-SOPs, searchable business archive.
Financial Invisibility & Cash Flow Blindness	Revenue is mistaken for profit; costs, labour, GST and overhead are missed.	Daily profit visibility, cash gap alerts, monthly P&L produced.	AI profit engine, cash forecast, unit-cost calculator.
Hidden Profit Leakages	Small losses from discounts, wastage, theft, bad debt and wrong change compound daily.	Leakage % by category, shrinkage rate, recovery rate.	Anomaly detection, credit reminders, waste and fraud alerts.
Credit Exclusion & Formal Finance Gap	No records means no loan history; micro businesses get stuck with costly informal credit.	Credit trail built, lender-ready statement generated, approval readiness score.	Alternative credit score, bank-ready financial profile.
Government Scheme Blindness	Eligible owners do not know schemes, documents or application steps.	Scheme matches found, forms completed, deadlines tracked.	AI scheme navigator with guided applications in Tamil.
Market Intelligence Void & Information Asymmetry	Owners buy and sell without price trends, demand shifts or competitor visibility.	Trend alerts, competitor comparison, seasonal demand forecast.	Market radar, commodity alerting, opportunity detection.
Decision Fatigue & Cognitive Overload	One person handles all roles; fatigue leads to slow, low-quality decisions.	Task overload, decision delays, burnout risk.	AI priority planner, nudges, automated routine decisions.
Knowledge Death / Craft Mortality	Skills, recipes, and supplier know-how disappear when the owner leaves.	Knowledge captured, handover readiness, documentation coverage.	AI knowledge capture, craft digitisation, succession planner.
Customer Retention Invisibility	No CRM means repeat customers, churn and loyalty are invisible.	Repeat rate, churn rate, reactivation rate, offer conversion.	Voice CRM, reactivation engine, personalised offers.
Digital Market Access Exclusion	Businesses stay local because they lack listings, digital presence and onboarding help.	Profiles created, catalogue live, orders from outside local area.	ONDC, WhatsApp catalogue, Google profile, listing generator.

Package 3 Overview

- Purpose: Understand the market.
- Core focus: CRM, Offers, Market radar, Opportunities, Growth & reputation
- Built for voice-first, Tamil-first adoption.
- Turns the 10 shared problems into one package-level system.

Package Map

Layer	Solves	Output
Problem coverage	Operational memory, continuity, learning	Business stays documented
User value	Voice-first, low friction, Tamil support	Easy daily adoption
Business value	Faster decisions, less waste, more growth	Practical ROI

Feature Cluster 1 — CRM

- Focus: Feature Cluster 1 — CRM

#	Feature	Solves	Input	AI output / impact

1	Voice-First Customer CRM	P146, P2	Customer purchase voice note	Customer profile | Knows every buyer
2	Repeat Customer Identifier	P146, P155	Visit history	Loyal customer list | Rewards loyal buyers
3	Lapsed Customer Reactivation	P147, P157	Last-visit dates	Win-back message | Brings customers back
4	Post-Purchase Feedback Collector	P148, P153	Purchase details	Feedback request | Hears customer truth
5	Personalised Offer Generator	P149, P158	Purchase pattern	Custom offer | More repeat orders
6	Referral Tracking System	P150	Referral mention	Referral log | Turns customers into promoters
7	Occasion Marketing Engine	P151	Birthday / festival dates	Greeting + offer | Loyalty grows
8	WhatsApp Broadcast List Builder	P152	Customer database	Segmented lists | Targeted communication
9	VIP Programme Manager	P155, P159	Customer revenue data	VIP tiers | Treats best customers well
10	Churn Early Warning System	P157	Visit frequency	Churn alert | Stops silent churn

Feature Cluster 2 — Offers

- Focus: Feature Cluster 2 — Offers

#	Feature	Solves	Input	AI output / impact
1	Upsell & Cross-Sell Recommender	P158	Current purchase	Recommended add-on | Raises basket size
2	Tiered Customer Pricing Engine	P159	Loyalty tier	Price tiers | Rewards repeat buyers
3	Customer Profitability Ranker	P116, P155	Revenue + cost to serve	Profit ranking | Invest time where it pays
4	WhatsApp Commerce AI	P152, P170	Product list + customers	Auto showcase + order capture | Sells without typing
5	Post-Sale Follow-Up Automator	P154	Purchase date	Follow-up sequence | Improves service trust
6	Local Commodity Price Alert	P102, P107	Commodity category	Price alert | Buys at better rates
7	Competitor Price Monitor	P101, P106	Competitor names	Price comparison | Stays competitive
8	Festival Demand Calendar	P104, P109	Business type + festival dates	Demand calendar | Plans early
9	Seasonal Planning Advisor	P5, P104	Past sales + seasons	Season plan | No surprise rush
10	Demand Trend Monitor	P103, P108	Sales history	Trend detection | Sees growing / fading demand

Feature Cluster 3 — Market radar

- Focus: Feature Cluster 3 — Market radar

#	Feature	Solves	Input	AI output / impact
1	Sector Trend Feed	P111, P117	Business category	Weekly trend brief | Stay updated
2	Local Opportunity Signal Detector	P115	Location + business type	New opportunity alert | Finds hidden openings
3	Peer Business Benchmarker	P114, P45	Business profile	Peer comparison | Knows where it stands
4	Export Market Identifier	P105	Product type	Export leads | Beyond local market
5	B2B Buyer Connector	P215	Product capacity	Bulk buyer matches | Sell bigger orders
6	New Product Opportunity Spotter	P115, P130	Feedback + market gap	Product ideas | Data-led innovation
7	Consumer Insight Feed	P117, P108	Sales + feedback	Consumer shift report | Adapt before others
8	Wholesale vs Retail Margin Explainer	P113	Price chain data	Margin stack view | Choose right model
9	Raw Material Alternative Finder	P110, P183	Current raw material	Alternative source | Reduce dependency
10	Trade Event Alert System	P112	Location + sector	Fair / expo alerts | More B2B exposure

Feature Cluster 4 — Opportunities

- Focus: Feature Cluster 4 — Opportunities

#	Feature	Solves	Input	AI output / impact
1	GeM Tender Alert Engine	P118, P169	GST + business type	Tender matches | Government sales opportunities
2	Regulatory Change Alert	P111, P100	Industry type	Rule update alert | Avoids compliance shocks
3	Fish Price Discovery Tool	P203	Fish variety + location	Landing price | Fair selling price
4	Pre-Harvest Price Lock Advisor	P190	Crop + harvest date	Advance price options | Avoids harvest crash
5	Weather-Linked Demand Planner	P213	Weather forecast	Sales forecast | Plans for rain / heat
6	Pre-Order Estimation AI	P214	Confirmed orders	Purchase quantity | Stops over-cooking
7	Cold Chain Connection Finder	P191	Product + location	Nearest cold chain | Less post-harvest loss
8	Crop Insurance Advisor	P192	Crop + acreage	Insurance eligibility | Protects farm income
9	Soil & Input Optimiser	P193	Crop + yield history	Input recommendation | Better farm ROI
10	Dairy Price & Quality Guide	P201	Milk quality / location	Price guide | Gets paid fairly

Feature Cluster 5 — Growth & reputation

- Focus: Feature Cluster 5 — Growth & reputation

#	Feature	Solves	Input	AI output / impact
1	Poultry Health Alert System	P202	Flock size + location	Disease alert | Avoids mass loss
2	Market Asymmetry Explainer	P113, P191	Cost + market price	Value chain view | Sees who captures margin
3	Local Price Intelligence Feed	P101	Competitor set	Price comparisons | Stays in market range
4	Customer Frequency Heatmap	P146, P157	Visit log	Heatmap | See busy and weak days
5	AI Review & Reputation Monitor	P148, P160	Online feedback	Reputation score | Manage reputation
6	Customer Segment Builder	P108, P116	Customer database	Customer segments | Targeted marketing
7	Occasion-Based Offer Builder	P151, P109	Festival calendar + customer list	Festival offers | Bigger seasonal sales
8	Service Recovery Alert	P153, P157	Complaint details	Fix recommendation | Recover unhappy customers
9	New Customer Acquisition Advisor	P147, P168	Business type + local area	Acquisition ideas | Finds new buyers
10	AI Recommendation Engine	P158, P115	Customer profile + product history	Next-best-offer | Smarter selling

How this package works in the real world

- Understand the market. through simple voice or WhatsApp input.
- Every feature is mapped to one or more of the 10 shared core problems.
- The output is minimal, actionable, and designed for low-literacy users.
- The package can be used as MVP, then expanded into a full AI OS.

Impact if this package works

Visible effect	Invisible effect	Business result
Less manual work	Business memory no longer depends only on the owner	Faster daily decisions
Better visibility	Hidden losses become measurable	Higher profits
Cleaner records	Customer / supplier / finance history preserved	Easier growth and handover
