VEPARI AI

Access, Scheme & Digital Expansion Intelligence

Package 4 • 50 features • 10 shared core problems • Connect to the system.

Clean structured deep-dive document for startup / hackathon use

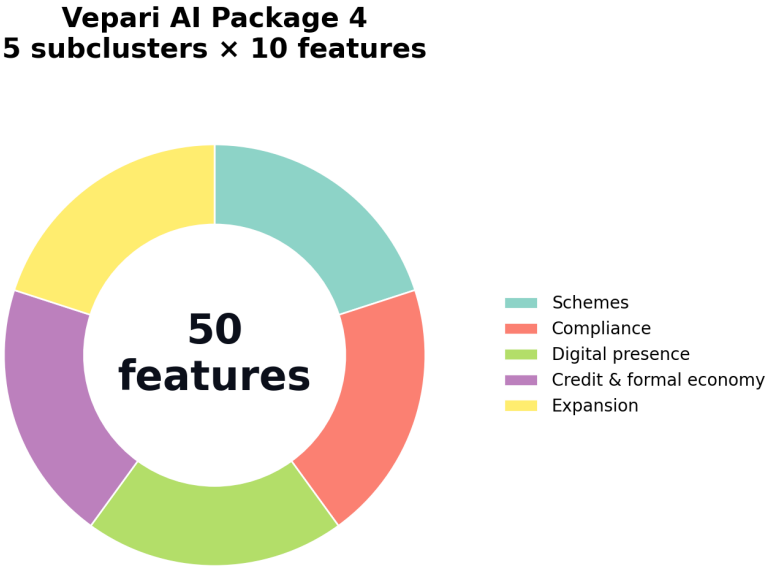

Goal: turn 220 micro-enterprise problems into 4 clean docs, each with 50 features, charts, diagrams, and AI solutions.

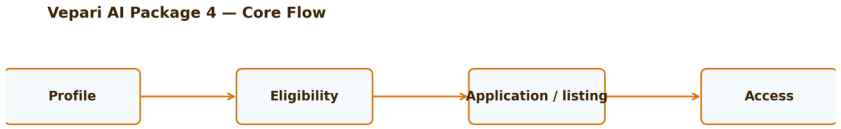

10 Core Problems (Shared Across All 4 Documents)

Core Problem	Why it is a problem	Measure	AI response
Operational Blindness & Business Amnesia	Business memory stays in one owner's head; no records, no SOPs, no continuity.	Tasks logged, customer/supplier history stored, decision recall time.	Voice-first memory engine, auto-SOPs, searchable business archive.
Financial Invisibility & Cash Flow Blindness	Revenue is mistaken for profit; costs, labour, GST and overhead are missed.	Daily profit visibility, cash gap alerts, monthly P&L produced.	AI profit engine, cash forecast, unit-cost calculator.
Hidden Profit Leakages	Small losses from discounts, wastage, theft, bad debt and wrong change compound daily.	Leakage % by category, shrinkage rate, recovery rate.	Anomaly detection, credit reminders, waste and fraud alerts.
Credit Exclusion & Formal Finance Gap	No records means no loan history; micro businesses get stuck with costly informal credit.	Credit trail built, lender-ready statement generated, approval readiness score.	Alternative credit score, bank-ready financial profile.
Government Scheme Blindness	Eligible owners do not know schemes, documents or application steps.	Scheme matches found, forms completed, deadlines tracked.	AI scheme navigator with guided applications in Tamil.
Market Intelligence Void & Information Asymmetry	Owners buy and sell without price trends, demand shifts or competitor visibility.	Trend alerts, competitor comparison, seasonal demand forecast.	Market radar, commodity alerting, opportunity detection.
Decision Fatigue & Cognitive Overload	One person handles all roles; fatigue leads to slow, low-quality decisions.	Task overload, decision delays, burnout risk.	AI priority planner, nudges, automated routine decisions.
Knowledge Death / Craft Mortality	Skills, recipes, and supplier know-how disappear when the owner leaves.	Knowledge captured, handover readiness, documentation coverage.	AI knowledge capture, craft digitisation, succession planner.
Customer Retention Invisibility	No CRM means repeat customers, churn and loyalty are invisible.	Repeat rate, churn rate, reactivation rate, offer conversion.	Voice CRM, reactivation engine, personalised offers.
Digital Market Access Exclusion	Businesses stay local because they lack listings, digital presence and onboarding help.	Profiles created, catalogue live, orders from outside local area.	ONDC, WhatsApp catalogue, Google profile, listing generator.
